THE NEWS OF STONY PLAIN AND DISTRICT.

Mr Glen Carmichael left on
Monday to resume his duties
as teacher up at Moose Por-
tage.

Prof. Larson of the Royal
Cafe attended Saba Beach's
sports day on the 6th.

The Foth Newly-weds were
serenaded Sunday Eve. in the
night style, and Mr Foth
kicked thru with the coin to
the serenaders' captain.

Miss Josephine Alt was a
week end guest with Mrs Car-
michael.

Officer Williams of the Pro-
vincial Dept. of Health gave
Stony Plain the once-over this
week.

Owing to the rain on Tues-
day the ball game with the Arrow
Buses had to be postponed.

Workmen were busy Mon-
day erecting a new sign, on
Mr Kelly's general store. The
name and the business are
done in Highland blue; on a
Royal blue background.

Thurs. Aug. 23, is the date
set by the Dept. of Education
for the holding of Supplemental
exams.

MISSIONFEST, SUNDAY, AUGUST 15.

Peace Lutheran Church,
Spruce Grove.

Rev. H. Karing, Pastor.

Speakers:

Rev. W. C. Eifert, Leduc,
Rev. August Mueller, of St.
Peter's Church, Edmonton.

NEWS BRIEFS.

A quartet of Detroit school teachers
sailed recently on board the Canadian
Pacific liner Empress of Canada from
Vancouver for the Far East on a
round-the-world tour which will bring
them back to Detroit by way of Europe
and the British Isles in the early
Fall.

Heroine of a score of screen romances,
denim Janet Gaynor, accom-
panied by her mother, left recently
aboard S.S. Empress of Britain for a
European trip. Miss Gaynor made her
visit as quietly as possible, and did not
accept interviews.

A 4-day hike among the flowering
Alpine meadows below the glaciers of
Yoho Valley, Aug. 5-8, was the 1934
objective of the youngest outdoor so-
ciety in the Canadian Rockies. This
infant, less than a year old, was born
last summer of the enthusiasm of 50
hikers, who named themselves Sky
Line Trail Hikers of the Canadian
Rockies.

From humble beginnings, the local
bargain coach excursion idea of the
C. P. R. has spread until public re-
sponse is enthusiastic right across the
Dominion. Record figures were re-
corded for Dominion Day vacation and
every week end sees similar repetition
of the idea in all sections of the Do-
minion.

Despite the financial stringency of
late years, the Festival movement of
western Canada has steadily increased
in the number of contestants and has
even started new Festivals, says G. S.
Matheson.

Six locomotive engineers, S. I. Mor-
tyre, A. W. Hobkirk, J. H. Weston, J.
J. Hennecey, A. Campbell, M. Balesky,
of the C. P. R., were guests at a ban-
quet at the Palliser hotel, Calgary, re-
cently, on the occasion of their re-
tirement after lengthy service.

"The outlook remains on a much
improved basis, with prospects this
year above those of last."—C. P. R.'s
Agricultural Dept.'s crop report, re-
cently issued.

To Write for the Press.

"Hon. John E. Brownlee, who has
served the people of Alberta
with distinction for the past thirty-
one years, first as attorney general
and for the greater part of the
period as prime minister, will con-
tribute an exclusive series of arti-
cles to the United Farmer, com-
mencing at an early date," states
The United Farmer.

United Church Services.

Union services between Spruce
Grove and Stony Plain United con-
gregations will be continued during
the month of August, when the service
will be held in Stony Plain church at
12 o'clock noon every Sunday. There
will be no service at Spruce Grove
during August.

What! Another Service Sta.?

It didn't seem possible that any-
one would be anxious to set up
another service station here for
motorists, but such seems to be the
case. Two brothers, mechanics from
the City, were here, the latter part
of last week, seeking a location.
They wished to go into the busi-
ness of washing, painting or sim-
onizing automobiles, and operate
in other branches along this line.
They took a look, among other
places, at the old power house site
on north Main St., and this seemed
to have made an impression on the
men as to its suitability.

It is now up to the local car
salesmen to scatter more automo-
biles thru the district, as a means
of providing meal tickets for at-
tendants at the service stations we
now have—and those which are
to come.

On the Screen Tonight.

The screen picture "Made on
Broadway," to be shown in Kelly's
Hall tonight, Aug. 9, promises to be
one of the best shown here so far
this season.

A particularly good show was
put on last Thursday, which in-
cluded a new reel, a hilarious
comic, and the main picture, Dor-
thea Wisk in "The Gracie Song,"
a picture in a class by itself—an
exquisite picture in beautiful set-
tings.

Mr. Miller's New Layout.

The construction work and the
installing of the gas tanks and
pumps having been completed in
record time, John H. Miller's new
Service Station was ready for
business on Saturday, on which
day he began servicing his custom-
ers. A full stock of requirements
for car owners and truck owners
will be carried, and no doubt his
old friends will not fail to give
Johnnie a call when in need of any
of these.

What Jealousy Does.

Mr. Murgatroyd, formerly a
hired man on the M. Hennig
Sr. farm at Golden Spike, is
said to have run amok on
Saturday Eve. It appears this
gent is infatuated with a
handsome young lady, whom
he chooses to regard as his
fiancee, and resents attentions
being paid her by other gents.
On the evening stated he
spotted a man whom he re-
garded as a rival driving a
closed car. Morgie is said to
have grabbed a pitchfork and
shattered the windows of the
car, the lines of the fork
piercing the driver's arm. The
owner of the arm took ex-
ception to this treatment and
complained to the police. Of-
ficer Bone, after a hot chase
thru fields of grain, succeeded
in getting the "dabblers" on
the fugitive and getting him
to the donjon keep in Ed-
monton. Previous to this ad-
venture, Morgie is said to
have been on speaking terms
with the police.

To Stimulate Objective Thinking

The topay-truity condition in which the world finds itself to-day, naturally leads to serious thought on the part of everyone. Why should there be so much penury and want in the midst of a surplus of commodities. What are the real causes of stagnation of trade the world over. One hears that the capitalistic system is doomed, and out of the present chaotic conditions a new order is bound to be established. Many theories are being continually advanced, designed to produce a new Utopia. The history of the world establishes the fact that all reforms necessarily come slowly. There can be no rapid realization of many obviously needed changes in our social system. But the world does not stand still, a forward and not a backward movement is inevitable. The encouragement and not the suppression of constructive thinking and expression of thought would be of material assistance. In the annual address of Principal Fyfe of Queen's University, reference was made to the stimulation of thought by means of discussions in the class rooms. He is reported in part as follows:

"In our academic seclusion we sometimes catch from a busier world the echoes of an accusation that the Universities of Canada are becoming 'nurseries of anarchy and revolution'. So far as such charges have any basis except hysteria, they may serve to encourage us, for they seem to indicate that students are in some measure acquiring the art of looking at both sides of disputed questions, an art in which it is our duty to encourage them. The ideal of suppressing enquiry and free speech, which has for the moment established a tragic dominance in many parts of the world, is nowhere more absurd than in a University, where men and women gather to exercise their faculties of curiosity and logic. Those faculties in them are necessarily immature; their utterances are often crudely dogmatic. But to stifle thought and utterance would be in a University the basest treason. As Penn said, 'Whoever is right, the persecutor must be wrong'."

"If we are to stimulate in our pupils objective thinking, we must be equally free in speech and thought ourselves—but not equally rash. Propaganda is no part of a teacher's proper function. He is not concerned to produce opinion, a temporary state of conviction which can be quickly changed by counter-propaganda. His aim is to stimulate the growth of intelligence, the power of detached judgment. To that end he may exercise in the class-room every art of sophistry, but if he blinks his way into the outer world, where opinions clash unanchored both from fact and reason, it behoves him to remember what astonishing weight that world attaches to a professorial pronouncement. The dignity of the University stalks beside him on the platform, sternly demanding judicial sobriety. A University teacher should certainly be clever; he needs to be wise; and of the factors of wisdom not the least are self-restraint and kindness and patience."

Education In Russia

Denver Man Still Driving Roadster Bought In 1916

C. C. Dill, a Denver roofing contractor, estimates that he has got 400,000 miles out of his 1908 roadster. He bought the machine in 1910, after it had been driven about 2,000 miles. In 1915 the speedometer gave up and stopped at 240,000 miles. Since then he has been driving it steadily, from coast to coast, and from the Great Lakes to Alabama. Not once has it been involved in an accident, or brought its owner into difficulties with the law.

Chinese Form Of Torture

Used Skin Of Rhinoceros To Crush Political Prisoners

The ancient Chinese had some strange uses for the rhinoceros, according to a report by an American archaeologist. One form of torture was to wrap a political prisoner in the hide of a freshly killed rhinoceros. As the hide dried it contracted and slowly crushed the victim. Another use the ancient Chinese had for rhinoceros skins was for covering funeral cars. Also the armour of the bronze-age warriors was made of it.

The movement of sheep and lambs in Canada from farms to livestock yards and packers showed a substantial increase during 1933 and was well above the five-year average, 1929-1932.

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Nausea, Vomiting, or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 88 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side. Put it only by The F. M. M. Co., Ltd., Toronto, Ont.

Gold Pouring Into London

Great Increase In Foreign Deposits Of Precious Metal

The golden tide, unexampled in the history of the world's monetary movements, continues to pour into London.

It began a year ago with a gold influx at the rate of \$25,000,000 weekly, then it increased every year to \$62,000,000 weekly, and now it averages 45 millions weekly and shows no indication of declining. As soon as gold arrives in England from South Africa, Canada and other producing countries, it is bought by French, German, Dutch and American buyers, nervous about the financial state of affairs in their own countries, and stored away uselessly in the vaults of London banks, where they know it cannot be touched. Already in the square mile that constitutes the city of London more precious metal has accumulated than ever King Solomon's legendary mines contained. The latest figures, covering a period of nine months, show gold importations valued at \$1,000,000,000. Exports reached less than \$500,000,000. Altogether, at the moment one billion and a quarter of foreign gold is stored in the city banks—a figure which exceeds any previous records in peace time.

Bankers do not want this gold; they cannot use it either to provide credits for industry or work for Britain's unemployed. Moreover, any fresh financial upheaval in Europe might cause its flight from London, with disastrous effects on sterling's international stability. Its uselessness is further emphasized by the fact that, although London's vaults are bursting with it, the official government figures reveal that the British people's purchasing power in the way of wages and salaries has been decreased through an economy campaign by \$310,000,000 since the gold crisis of 1931.

Wonder Of Modern Surgery

Doctors Can Remove Faces Eaten Away By Disease

Persons whose faces are disfigured by disease or accidents no longer need live the remainder of their lives in almost of being seen in public.

Almost entirely new faces can now be manufactured by surgeons, according to Dr. Gordon B. New and Frederick A. Figg, of Rochester, Minn. The doctors described the operations to members of the American Medical Association during the annual session of that group in Cleveland.

Operations to renovate faces are now performed after disease eats away bone, cartilage and mucous membrane, or following the removal of tumors, the doctors said.

Artificial plates are inserted in the cheek-bones, jaw-bones and nose; noses are "lifted" by means of props, and skin and bone are borrowed from other parts of the body to be grafted to the face.

And while these things are accomplished, the doctors asserted, the person again can face the world with something akin to confidence.

Making History

Great Seal And Royal Signet Given To South Africa

British Empire history was made recently when King George handed to Charles to Water, South African high commissioner to the United Kingdom, the great seal and royal signet of the Union. The king's act made South Africa the only Dominion to possess a great seal of its own.

The South African seal, struck at the royal mint, bears the king's head on one side and the South African coat of arms on the other.

Canadian production of timothy seed is less than one half of domestic requirements, as indicated by importation statistics, while substantial export surpluses of alfalfa, sweet clover, and Canada blue grass are usually produced yearly.

The Christian Science folk built a new publishing house in Boston during the years of depression, paid \$4,000,000 for it in cash and never held a garden party or a church supper.

The growing of field corn for grain production in Canada is practically confined to Ontario.

Agricultural Notes

Interesting Items Gleaned From Many Sources

More than two-thirds of the brome and western rye grass seed of commerce in Canada is sealed in the sack and certified to be free from the seeds of couch grass.

The trading room of the Winnipeg Grain Exchange is connected by telegraph with all important grain markets, and there is direct access by telegraph and telephone to all parts of Canada and, indeed, to all parts of the world.

Experiments conducted both in the United States and in Canada have shown that the two species of lice infesting cattle are easily controlled by sodium fluoride, applied either as a powder or in solution at the rate of one ounce to a gallon of tepid water.

Nature played a significant part in causing the wheat surplus condition, notably by big yields in 1928 after good yields in 1927, in giving Europe excellent grain crops in 1929 following big crops in 1928, and in giving Russia large crops in 1930, and Europe record crops in 1932.

Individual tubes of cream, after the style of toothpaste, have been placed on the market in Germany at low prices. Each tube has a round flat base which enables the tube to be stood upright, and holds a sufficient quantity of cream for one cup of tea or other beverage.

Regarded as a harmless nuisance a few years ago, the economic entomologist has now reached an important place where he has no longer to apologize for his existence. Such organizations as "spray services" are known and valued by those who use them.

The keeping of livestock is one of the oldest occupations of civilized man. It represented the wealth of all the nomadic tribes and peoples, and the principal reason why those people were nomadic arose from the necessity of constant movement in order to provide grass and water for their flocks and herds.

For having marked cheese with a false date of manufacture, a factory manager in Eastern Ontario was convicted and fined. The provisions of the new regulations under the Dairy Industry Act require the correct date of manufacture to be marked on the cheese within 24 hours after removal from the press.

The more recent demand for lighter weight cattle showing a better finish, the question of international trade relations involving tariffs and embargoes, monetary standards and allied financial conditions generally, all have a significant influence on beef production not only in Canada but in all the beef producing countries of the world.

Legislation giving some degree of control over the marketing of natural products, mainly agricultural, is found in most of the principal countries of the world, and The Natural Products Marketing Act, 1934, of Canada is an attempt to give the Dominion legislation similar to that at present found in the statutes of the United Kingdom, Australia, and other parts of the Empire.

Annual pasture crops are important in many parts of Canada. In the prairie provinces, perennial grasses and legumes cannot be depended upon to supply grazing during the periods of dry weather which occur almost every season. This is the case also, though not to the same extent, in Ontario and Quebec. The most feasible method of overcoming this difficulty is to seed one of the grass crops to provide pastures when the perennial grasses are unproductive. The cereals used as annual pasture crops are oats, barley, wheat, and spring rye, oats being by far the most important for this purpose—Scientific Agriculture.

Glass Is Latest Vogue

Glass and steel are the vogue for modern homes in England this season. Glass what-nots and chromium-tubed easy chairs are among the most popular pieces. Glass beds are coming "into style." Steel drawing rooms with glass bedrooms are considered the latest in human habitation.

Red tape can slow up business even worse than red lights can traffic.

Appoint Commission

To Inquire Into Claims Of Alberta For Further Resources Compensation

Hon. Andrew K. Dyar, judge of the Manitoba court of king's bench; Hon. Thomas M. Tweedie, judge of the supreme court of Alberta, and George C. Macdonald, Montreal, have been constituted a commission to inquire into claims of the province of Alberta for further compensation with respect to the administration and control of its natural resources. Announcement of the appointment was officially published recently. Mr. Justice Dyar is chairman.

With the exception of Mr. Justice Tweedie the commission is the same as that which investigated similar claims on the part of Saskatchewan recently. On the completion of the Alberta report the commission will render to the federal government joint recommendations on behalf of both provinces.

Secret Method Revealed

How Scotland Yard Determines Age Of Finger Prints

Scotland Yard's secret method of telling the age of finger prints was revealed in Sessions Court in London during the trial recently of John C. O'Connor, charged with breaking into the Lady Margaret Day Nursery. Evidence against him was a thumb-print found on a clock, but O'Connor said he had only handled the timepiece in 1932. Detective-Sergeant Jack Livings, of New Scotland Yard, said he had no doubt the fingerprint was that of O'Connor. He added: "The powder, we apply to latest impressions to bring them out will stick to the ridges of a new print, but an old one is dry and the powder will not adhere to it. A fresh print can easily be removed by a duster, but a stale one can only be removed by a damp cloth."

The principal European countries, notably France, Italy, and Germany, have stringently controlled the imports of dairy products during the past few years by tariffs, quotas, and other means. This has resulted in a steady increase in the quantities of butter and cheese exported to the United Kingdom.

Both the production and consumption of oats in Canada have followed a downward trend since 1920.

"It Helps Me!"

That's what 98 out of 100 women say after taking this medicine. It quiets quivering nerves, gives them more strength before and after childbirth, tides them over Change of Life... makes life seem worth living again.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Hang it in your kitchen. Pull out one sheet of Waxed Paper at a time.

W. N. U. 2058

Oats Proven To Be The Best Annual Hay Crop. After Tests Made At Experimental Farms

Interesting data on cereal grain crops for annual pasture are given in the June number of Scientific Agriculture as a result of investigations by Dr. Kirk, Dominion Agrostologist, Ottawa; J. G. Davidson, assistant superintendent, Dominion Experimental Farm, Indian Head, Sask., and S. N. Hamilton, Division of Chemistry, Ottawa. It is pointed out that annual pasture crops are important in many parts of Canada, and that, while the superiority of oats as the one best annual hay crop has been generally recognized throughout Canada, it is not so clear as appreciated that oats are also the best annual pasture crop. The data submitted in Scientific Agriculture supports the view that the oats crop is even more valuable for pasture than for hay as compared with other cereals.

There are certain questions relating to the use of cereal grains for pasture that have not been investigated. Definite information is lacking on the relative productivity and nutritive value of the different cereals. It is not known whether they have the greatest power for regrowth after having been eaten off, and which of them will produce the greatest number of pasture crops in a single season. Several other questions also require answering. What is the best time to begin pasturing? How does the percentage of protein in the herbage compare at different stages of growth? Will the fresh young growth provide a high protein feed as is the case with perennial grasses, and, if so, is the total seasonal yield of protein satisfactory? Are the results better with early than with late seeding, and how do the different cereal crops compare in this respect?

In order to answer these questions, an experiment was started in the spring of 1932 at the Dominion Experimental Farm, Indian Head, Saskatchewan. Four cereals were grown, namely, oats, barley, wheat and spring rye. These were cut with a horse mower to simulate grazing. Provision was made for six plots of each cereal, clipping to begin at different stages of growth at (1) 3-leaf stage; (2) 5-leaf; (3) short blade, (4) early heading, (5) fully headed, and as often thereafter as the growth reached seven to eight inches. These measurements refer to the leaf mass, and the following is the summary of the results obtained. Oats, barley, wheat and spring rye were compared with reference to yield, feeding value, and utilization as annual pasture crops. With respect to yield of dry matter per acre and per centage of protein, oats were always superior to barley, followed in order by wheat and spring rye. In total average yield of protein per acre from the early seeding, oats exceeded barley by 54 per cent, wheat by 96 per cent, and spring rye by 112 per cent. At the later date seeding, oats exceeded barley by 23 per cent, wheat by 53 per cent, and rye by 86 per cent. Oats produced six cuttings in 1932, and seven cuttings in 1933 as compared with four cuttings in both seasons of the other three crops. Largest yields of protein per acre were obtained from oats when pasture cuttings were begun at the 5-leaf stage. Oats from the early seeding produced 3,000 pounds of dry matter per acre, with an average protein content of 25 per cent. This is equivalent to a greater carrying capacity than was obtained at Ottawa on good quality native bluegrass sod. Young oats herbage may be regarded as a highly concentrated protein feed.

During the first five months of this year, 935,500 pounds of dressed poultry have been exported from Canada to the United Kingdom. Compared with the corresponding period of last year, this is an increase of 537,122 pounds, and the demand for Canadian poultry still continues. Most of the poultry shipped was packed, inspected, and graded according to government standards.

Radio Discovery

Find That Radio Signals Reach A Height Of 1,000 Miles

The highest point yet reached by human signals, a "refracting region" 1,000 miles overhead, which reflects wireless signals back to earth, has been discovered with Harvard instruments.

From 100 to 200 miles aloft is the ordinary height of the layers of air known to reflect wireless waves. Previously the very greatest height of such layers has been about 500 miles.

But 1,000 miles is above the regions at which scientists ordinarily describe as the outer limits of the earth's atmosphere. And the Harvard discovery may lead to a redefinition of the effective height of the atmosphere.

By Ruth Rogers

SMART FOR WARM DAYS—TOWN OR COUNTRY

Keep cool in sheer cotton no matter how high thermometer climbs. Here's a perfect summer dress for casual daytime wear.

It's the cool sleeveless type with ruffled caped shoulders that you can wear to town as well as for the country.

Chiffon cotton voile print, so soft and pretty, made the original. It's tubular, too.

In turquoise blue, aqua-blue, ice-cream pink or white tub silk, it's very charming.

Striped handkerchief linen, dotted sheer lawn, eyelid batiste, etc., are very cool and smart mediums.

Style No. 388 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 3 yards of 36-inch material with 1 1/2 yards of 36-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin preferred). Wrap coin carefully.

New Zealanders Healthy

Average Life Span Considered To Be World's Record

Will it be possible for us to increase our life span by 10 years?

Gaining inspiration from the example set by New Zealanders, who should be able at least to increase the average life span of American men six years, from 59 to 65. Women apparently need not strive so ambitiously for longevity: in living to the average ripe old age of 62 they already have a three year lead over men in the marathon of life.

Men and women live to average ages of 65 and 67 respectively in New Zealand, which Metropolitan Life Insurance Co. statisticians consider to be a world's record. They state that the white population of the United States still has about 10 1/4 years to gain before reaching a hypothetical ideal estimate of a little more than the Biblical three score and ten. An advance toward this has already been made, reports show, during 1932 and 1933 which were exceptionally good health years. Encouragement comes with the report that since the beginning of the century a gain of 10 years in the expectation of life of white males and 11 years for white females has been scored.

Excellent health management, particularly in the case of childbirth, is cited as a reason for New Zealand's excellent record. In the care of mother and child during a baby's infancy, medical effort is expended with the greatest effect. For girl babies the mortality rate has dropped to the exceedingly low figure of 25 in a thousand in comparison to 48 for the United States. The corresponding figures for boys give 60 deaths per thousand against 33 in New Zealand.—Science Service.

Largest Ruby Found

Believed to be the largest in the world, a ruby weighing 2,967 carats has been found in a village near Ratnapore. Experts state the gem, which weighs nearly two pounds, is defective in color, being pinkish instead of deep red. It is impossible to value the stone accurately until it has been cut.

The total annual consumption of slabs used in Canada is estimated at 1,500,000 pounds, so that any production over this amount requires to be exported. The production last year was about 4,000,000 pounds. The average price received by Canadian growers for slabs in the past five years has been about 10 cents per pound basis No. 1 grade.

Floating Power Plant To Provide World's Cheapest Electric Power From The Waters Of The Sea

A Heartening Sign

Recovery Of Canada's Newspaper Industry Is Good News

One of the most promising signs of the times is the recovery taking place in Canada's newspaper industry. For May (the latest available figures) the production exceeded by well over one million cwt. the production in May, 1933, while for the twelve months ending May the production was some 10,000,000 cwt. in excess of that for the previous 12 months.

This means much more than benefit for newspaper workers, or for the holders of newspaper securities. The newspaper industry is one of the greatest in Canada. It is one field of production in which this country holds a supreme place, and it is not too much to say that crisis through which the industry has passed contributed tremendously to the general depression.

Perhaps, too, the lessons of the past three or four years will mean future gain. They may have taught that in the newspaper industry, as in others, there can be such a thing as more of stocks and bonds and high-financing than the traffic will bear.—Ottawa Journal.

Golden Rod

Has Nothing To Do With Hay Fever Says Naturalist

Golden rod has nothing to do with hay fever and all the sneezes in the world won't shake the belief of W. Ormiston Roy, Montreal naturalist, who has been working the thing out in collaboration with Professor E. H. Wilson, of Harvard University.

Messrs. Roy and Wilson returned from the Gaspe peninsula and have made a report which bears out the belief of the late Thomas Edison that rayweed and not golden rod is responsible for pernicious hay fever.

Aviation In Australia

Australia is going ahead rapidly in organized civil aviation. In less than a year 49,000 passengers, 70,000 pounds of merchandise and 35,000 pounds of mail have been transported by air over the country. Australia has a population of less than 6,000,000 so that she is doing very well in the air.

SISTERS WIN HONOR FOR MURALS

Featuring the Mexican mural painting movement which has achieved international fame in the past few years is the participation of two Brooklyn sisters—Marion and Grace Greenwood, whose panels have aroused the favorable comment of Mexican and foreign critics. The Greenwood sisters, aided in their study of fresco technique by Paul O'Higgins, young California painter, obtained walls for decoration in Morelia, State of Michoacan.

Professor George Claude's floating power plant was completed at Dunkerque, France, recently, and he was prepared to turn out the world's cheapest commercial electric power. The power will be used right on board the ship to manufacture 1,000 tons of ice per day, he told 150 invited guests, all engineers. The French scientist will utilize thermal difference between surface and depth waters of tropical seas to create power.

Following experiments in Cuba in 1931 when he dropped a tube a mile and one-eighth long into Matanzas Bay to prove that power could be made by his process, he secured financial aid and himself purchased the steamer Tunisie, which French shipyards have just equipped with a power and refrigerating plant.

The ship is a nightmare of Jules Verne with its bridges and decks, laced with pipes, cylinders, valves and meters, all designed to aid in drawing electrical power from the sea. Professor Claude himself explained his process to his guests.

The George Claude process consists essentially in causing warm surface water of tropical seas to boil in a vacuum, put the steam to work in the turbines and condense it by cold water from the depths.

"Experiments made in 1928 and in Cuba in 1931 on a small scale confirmed theoretic findings. It remained to put them into a plant industrially exploitable.

"As I had to finance it myself, I thought of a flexible method; to equip a floating plant permitting the use of a relatively short vertical tube and installation in interesting points of the equatorial zone."

Professor Claude said it had also occurred to him to utilize the plant to make ice.

The plan calls for a tube with a 30-foot buoy to be dropped and anchored to the bottom.

A 2,300-foot tube, composed of 112 soldered sections, and nine feet in diameter, will bring the water to the plant from the depths. The plant itself will contain a vacuum boiler 80 feet long and 20 feet in diameter placed 35 feet beneath the surface of the seas.

An air extractor will make the vacuum in the boiler and vacuum pumps will bring up the water and pump the warm water as well.

The huge cylinder will contain four compartments for boiling and five for condensation. The steam produced in the boiling chambers will pass into the condensing chambers after passing through the turbines and creating power.

The cold sea water will do the condensing.

Eyes Getting Tired

Negro Claiming To Be 140 Asked Oculist For Test

A claimant to succeed the late Zoro Agha of Turkey as the world's oldest living person, appeared at a hospital in Rio De Janeiro, to have his eyes tested. Hippolyte Xavier Ribeiro, a negro, asserted he was 140 years old, and that he was beginning to have difficulty reading classified advertisements in the newspapers. Physicians were inclined to credit his claims that he was born in 1794 as a slave, and participated in a revolution of 1842 and the Paraguayan War of 1865. An oculist pronounced his eyesight perfect—only "somewhat tired."

Canada's "Sun Porch"

Lord Willingdon once referred to the British West Indies as Canada's "sun-porch." So far as the Bahamas are concerned they have become much more than that. Last year the Bahamas purchased goods from Canada to the value of \$1,305,790, an increase of five per cent over the year before. Practically all of the potatoes going to these islands were supplied by Canada, also butter, flour, oats, condensed milk, rubber and canvas boots and shoes.—Ottawa Journal.

December 21, 1620, was the date of the landing of the Pilgrims on Plymouth Rock.

WORLD HAPPENINGS
BRIEFLY TOLD

Gordon W. MacDougall, K.C., was appointed a director of the Royal Bank of Canada. Announcement was made following the regular meeting of the board of directors.

Probate of the will of Alice Stephen, Baroness Northcote, shows the baroness left a bulk of her fortune of \$1,825,000 to assist migration to Australia of British children.

Lifting of the ban against competitive games in London parks on Sundays has been recommended by the parks committee of the London county council.

July was the driest month in at least 20 years in Quebec, according to records at McGill observatory. The total rainfall for the month was only 85 inch. In July, 1914, the total fall was 37 inch.

Rats, gnawing at electric wires, are believed responsible for flames that broke out in the attic of the medical school of the University of Western Ontario, causing damage estimated to run into several thousands and dollars.

Three more governments have pledged themselves to place an embargo on war materials destined for the Bolivia-Paraguay war in the Chaco, it was announced at Geneva. The countries are Lithuania, Portugal and Uruguay.

Little Journeys In Science

WATER

(By Gordon H. Guest, M.A.)

Water is the most familiar of all chemical compounds. It covers about three-fourths of the earth's surface, the greatest depth of the ocean being about six miles. It is an important component of the air, and even "dry" land contains considerable quantities of water. It constitutes about 62% of beef, 87% of milk, 92% of water-melons, and 95% of cucumbers. Thus, when we buy normal milk we pay for about 87% water.

Living things, both plants and animals, cannot exist without it. Enormous shipping, fishing, and other industries result from the fact that three quarters of the earth's surface consists of sea water, and in addition, there is a great volume of fresh river and lake water so necessary to human beings and other creatures not inhabiting the sea.

Steam power is derived from water, and other mechanical power is obtained from falling water, as at Niagara where electricity is generated on a very large scale.

Pure water is odorless and tasteless. In thin layers it has no color that can be detected, but it has a bluish tint when observed through considerable thickness. When sufficiently cooled, it solidifies to a colorless solid commonly known as ice. When heated it boils and changes rapidly into water vapor, commonly called steam.

There is a general law of nature that substances expand when heated and contract when cooled. Fortunately for man and other living creatures water does not always follow this law. When warm water is cooled it contracts according to the law of expansion and contraction, until it reaches four degrees centigrade. For some reason which scientists cannot explain, from four degrees down as far as you wish to go water expands instead of contracting. Now, if it expands it will be lighter than it was above four degrees, and hence the cold water will rise to the surface. When the temperature drops to zero ice forms at the surface first, and then layer after layer is formed from the surface down as the temperature remains below zero.

All would be different if water followed the law of expansion and contraction rigidly. The water would become heavier as the temperature approached zero and this heavy cold water would drop to the bottom of lake or river. Ice would form first at the bottom and as the winter progressed the lake would freeze from the bottom up, until it was converted into a solid mass of ice. All water animals would be destroyed and the warmth of summer would not be sufficient to thaw it out.

LIVE AT HOME

By JACK MINER

There is no human power that can convince me that our loving God is to blame for this present crisis. The fact is for over four years we have allowed ourselves to go blood thirsty mad, right from the bar-room to the pulpit, and God did not settle all this world's affairs on November 11, 1918, for since that we have gone extravagantly crazy. Yes we have a vast throng of ten cent millionaires and have allowed ourselves to drift

to make this little spot nearer and dearer to your heart. Grow your own potatoes, cabbage, and other vegetables. Oh, yes, and if far enough south, plant a dozen mulberry trees. If in the north, plant Mountain Ash. Watch for people who have nice flowers and kindly ask them for a few plants such as iris, ask them for some hollyhocks, delphiniums, or Oriental poppy seeds. Yes, and a few sprouts from their lilac and

A view of Jack Miner's home from the Public Highway. Notice the flowers planted by the side of the road.

away out and plunge head first into imaginary happenings, as someone has said, "Like a blind man in a dark room looking for a black cat that is not there."

Now, we are beginning to wake up and find we have been fishing on the wrong side of the boat. Yes, we begin to realize we have missed a golden opportunity and are dissatisfied with ourselves and everybody else, but here we are a thousand

snow-bell bushes, and a hundred and one plants and shrubs that I am absolutely sure will make your little home dearer to your heart. Now, don't let any landscape gardener or florist unload his services upon you, but plan it and plant it yourself. I tell you, a tree planted by your own hands can become a dear tree to you. My dissatisfied brother, try this plan and in less than five years you will be giving flowers to the other fel-

Photo shows automobiles parked along the Public Highway in front of Jack Miner's home showing public sentiment in the place.

miles from home and nothing to show for it.

Now to those of you who have no home of your own, please let me advise you to try the "live-at-home" remedy. Take ten per cent. of the money you have extravagantly spent the last five years and buy at least five acres of Canada's cheap land.

Remember, Canada has the very best helpful forestry department; get in touch with them and watch for wild flowering shrubs, such as Hawthorns that you can plant yourself

low. Personally, the little trifles I have been able to give away have brought me greater dividends than the few thousand dollars I have made in my brick and drain tile business.

Now I don't care who you are, for it is the thoughts you allow your heart to entertain that give you desires and cause you to act, and I know you can enjoy the sunrise in your own garden with a hoe in your hands, and even though you have to live in a tent for a season, you will enjoy it more and sleep sounder than

when you are paying rent for four brick walls. And oh, what a blessed change. In a few short years you will find yourself living in your own little planned and built cottage, perfectly surrounded with a little bit of heaven and the fragrance, keyed up by the songs of a variety of birds, that come floating through upon your open window.

My dear friend, this is a dream, but it can be done and you can do it if you will only cultivate the desire. My grey hairs and scars of experience have compelled me to believe that a man can accomplish most anything he concentrates on. Let us all thank God that things are as well as they are with us and help ourselves by entertaining more "live-at-home" desires.

Noted Horticulturist Dead

Ernest Hutcherson Was Charter Member Of B.C. Fruit Growers
Ernest Hutcherson, 81, who was the first horticulturist at the Ontario Agricultural College at Guelph, Ont., and who gave instruction in 1879 to Hon. W. R. Motherwell, former Dominion minister of agriculture, is dead at Ladner, B.C., where he had resided 52 years.

Mr. Hutcherson resigned from the Guelph college in 1880. With the late Thomas McNeely, he set out probably the first commercial orchard in British Columbia.

He was one of the founders and charter members of the B.C. Fruit Growers' Association and was appointed the first fruit pest inspector in the province. In 1908, Western Australia applied to the B.C. government for a man to frame and enforce a fruit pest act for the state and Mr. Hutcherson was loaned. He remained on the government staff in Western Australia for 10 years.

Airport At Gretna Green

Mecca For Eloping Couples Is Up-To-Date
Gretna Green, Scotland's famous mecca for eloping couples, has just opened an airport and is eagerly awaiting the arrival of the first pair to elope by air. Richard Renison, the blacksmith "priest" who has married 2,000 couples over his arvil, plans to hold an air passport shortly. The first couple arriving by plane will be married free of charge and will be given a wedding present.

New Type Of Wool

Secret processes which make wool unshrinkable, remove the tickle, and add lustre are understood to have been perfected, at the Wool Industries Research Association laboratories at Torridon, Leoda. For the present these processes are being revealed only to members of the association.

One of the most important influences in the volume of cheese produced per hundred pounds of milk is the butter-fat content of the milk.

The production of milk in the province of Quebec is more important than the production of beef.

SUNDAY SCHOOL LESSON

AUGUST 12

AMOS PLEADS FOR JUSTICE

Golden text: "Love worketh no ill to his neighbor: love therefore is the fulfillment of the law." Romans 13:10.
Lesson: Amos, Chapters 5 and 7.
Devotional Reading: Proverbs 21:1-7.

Explanations And Comments

A Lament over Israel, 5:1-3. Amos has been called "the first doomer of Israel." Hear ye this word which I take up for a lamentation over you, O house of Israel: thus Amos begins our message. A "lamentation" is a technical term applied to poetry of a mournful tone, a dirge such as was chanted over the dead, as in David's lamentation over Saul and Jonathan (2 Samuel 1:17), or in the face of any calamity, such as Ezekiel uttered in Ezekiel 10. "The virgin of Israel is fallen; she is cast down upon the land." Although Amos wrote many decades before the destruction of Samaria, the consequences which he saw and of which he was so sure that he used the present tense, came to pass in 722 B.C. when Assyria conquered the city and carried its people off into exile.

Injustice and Oppression Denounced, 5:10-13. The gate, as we learned in an earlier lesson, is the broad, open space before a city gate where claims were adjusted. "They hate him that reproveh in the gate," cried Amos, "and they abhor him that speaketh uprightly." Amos knew only too well how he was hated in Israel. He was accused of blasphemy and high treason, and told by the priest Amaziah to "go, flee to the land of Judah, and eat there thy bread, and prophesy there: but prophesy not again any more at Bethel." And he had obeyed and there he wrote down the substance of the addresses he had given.

Amos next addressed the judges and accused them of trampling on the poor, and of taking a portion of their scanty harvest of wheat, for in no other way could they obtain justice except by thus buying it. "Retribution would overtake them; they would not dwell long in their fine houses of hewn stone, nor drink the wine from their pleasant vineyards."

Your transgressions are many, your sins mighty. You take a bribe from the rich and let them escape the penalty due, and withhold a man's rights who is too poor to pay a bribe. Moffatt translates: "I know your countless crimes, browbeating honest men, accepting bribes, defrauding the poor of justice."

A Way Of Escape From Penalty, 5:14, 15. Professor Kent paraphrases the verses in these words: "To whomsoever my words appeal, I repeat: persevere in your efforts to do that which is right in the sight of God, and he, the all-powerful and just, will not fail you. Undauntedly strive to put down public evil, and to purify the law courts; perchance a faithful few may yet survive the approaching destruction to enjoy Jehovah's blessing and favor."

Justice, Not Mere Ritual, Pleasing to God, 5:21-24. The prophet now represents God as saying: "I hate I despise your feasts, and I will take no delight in your solemn assemblies. But let justice roll down like waters, and righteousness as a mighty stream."

The Canada thistle is not native to Canada. It was introduced originally from Europe.

Bakelite is an artificial coal-tar product used as a substitute for hard rubber, celluloid, or amber.

MAY CALL ON WEALTHY FOR MORE TAXATION

Toronto.—Premier Mitchell Hepburn promised full consideration for the demands of the Ontario hunger marchers but refused to give an answer to any one set of definite questions submitted to him as to the government's policy on unemployment.

He described the questions as involved and unfair and declared the government was agreed conditions in Ontario were bad. At the same time he served notice on "men of wealth and affluence" that they might be called upon through taxation to contribute a larger amount to the public treasury.

For more than three hours Mr. Hepburn, Hon. Arthur Roebuck, attorney-general, and Hon. David Croli, minister of welfare, listened to spokesmen for the hunger marchers who came to Toronto from many scattered points. At the end they each spoke briefly and the marchers declared they are wholly satisfied with the interview.

A group of about 200 met the ministers and there were half a dozen speakers. At the end of the meeting they went out into Queen's Park to join a gathering of 2,000 or more and denounce the Hepburn government as an agency of the capitalist class.

Absolute freedom of speech and organization was promised in the province by Mr. Roebuck who declared the day of tyranny had gone. He heard complaints about the refusal of a permit to the marchers to meet in city parks and told them to meet on government property. That was not enough, a speaker said. They wanted the definite right to meet in any park.

"What do you want us to do," asked Mr. Roebuck, "go out and conquer Queen's Park?"

"The workers will conquer Ontario shortly," was the retort.

Mr. Roebuck said he had fought the battles of the workers for years and had not changed his views. He could picture himself in the shoes of any one of them making the same demands.

"Go on with your organization," he said, "and God bless you. No one will interfere with you. Make yourselves so strong you can enforce your demands on any government no matter what its politics."

Scheme Well Advanced

Imperial Airways Have Received Tenders For Flying Boats

London.—Tenders for a fleet of 20 multi-engined flying boats to be used in the projected Empire flying service have been submitted to Imperial Airways, according to the air correspondent of the Daily Telegraph, who says the scheme is well advanced.

The flying boats would accommodate from 30 to 50 passengers. In the winter, the correspondent says, the route will be by Bermuda and in the summer by Iceland and Greenland.

Aviation Program Reduction

United States Naval Aviation Construction To Be Reduced

Washington.—The United States naval high command was disclosed authoritatively to have determined on a sharp reduction in naval aviation construction.

Present plans, which may be altered, call for 274 fewer planes than the 2,184 which the navy had decided would be necessary under the Vinson bill authorizing a treaty strength navy by 1942. A thousand planes now comprise the naval air force, and plans had evolved to build the other 1,184 in annual installments.

Develop Tourist Trade

Winnipeg.—Col. F. C. Poussette, general manager of the tourist and convention bureau of Manitoba, is en route to Ottawa to attend a Dominion-wide conference on the development of tourist trade in Canada. Representatives from all parts of Canada have been invited.

W. N. N. 2058

Secure Low Interest Rate

Two Per Cent Has Been Obtained For Ottawa Loan

Ottawa.—Securing what is believed to be the lowest interest rate in the history of Dominion financing, a loan of \$50,000,000 has been negotiated with the Chase National Bank of New York and a group associated with it, bearing interest at two per cent and maturing in one year. Announcement of the loan was made by Hon. E. N. Rhodes, minister of finance.

With \$10,000,000 from the cash balances held by the government the loan will refund a \$60,000,000 treasury note issue bearing interest at four per cent and maturing on Oct. 1, payable in New York City. These notes will be called on Sept. 1, and the saving in interest rates over the year will amount to \$1,000,000. The issue being redeemed was sold for a 15-month period.

The new issue will not involve any public offer and may be called on the first business day of June, July or August, 1935. It was taken by the Chase National Bank, associated with the National City Bank of New York, the Bankers' Trust Company, the Guaranty Trust Company, the Chemical Bank and Trust Company, the Central Hanover Bank and Trust Company and the New York Trust Company.

Wants Small Navies

Absolute Minimum Is Idea Of New Japanese Premier

Tokyo.—Katsuko Okada, new premier of Japan, whose viewpoint on naval questions was awaited eagerly by the world, said he believes navies should be reduced to the smallest proportions possible.

But he added that Japan is dissatisfied with the arbitrary 5-5-3 ratio fixed by the Washington treaty of 1922 as Japan's proportion of capital ships in relation to Great Britain and the United States. Whether the Washington treaty is to be abolished has not yet been decided, he said.

"I cannot afford the present ratio principle in naval limitation, which hurts the self respect of certain nations," said the premier who was called to the head of the government from a long career as a naval officer. His observations were made at his first meeting with foreign newspaper correspondents.

To-End Abuses

Relief Is Promised For Industrial Workers In Ontario

Toronto.—Attorney-General Arthur Roebuck promised Ontario's hunger marchers there would be legislation by the government to definitely end gross industrial abuses. Legislation would be enacted at the next legislative session, he said, to bring industrial workers and employers together for the purpose of evolving a code to govern industry.

"It will be an act with more teeth in it than is contained in existing legislation," he said. "We are going to bring both sides together to work out a code. We are going to put the shyster employer out of business altogether in Ontario. There are other gross abuses which we will abolish."

High Roads To Reading

Uniform Readers To Be Used In Schools Of Western Provinces

Victoria.—New uniform readers and teachers' manuals will be used in grade schools and correspondence courses of the four Western Canadian provinces next term, starting in September, Hon. G. M. Wet, British Columbia minister of education, announced here.

The series will include a set of six readers and a supporting set of teachers' manuals and work books. The series is called "High Roads To Reading" and contains many notable features not present in the works it will replace. They have already been tried at the B.C. summer school for teachers and highly endorsed.

Communists In Germany

Breslau, Germany.—Forty-six Communists, accused of subversive activities, were indicted by a local court here and sentenced to prison terms aggregating 71 years.

HON. J. J. McLELLAN

Who has taken over the portfolio of Minister of Public Works in the reorganized Provincial Cabinet in Alberta.

Peasants Digging Free Gold

Rich Field Uncovered By Torrential Rains In China

Canton, China.—The national government dispatched troops armed with machine guns to the Yanking district near Kongmoon to drive off the villagers from the local gold diggings. During recent torrential rains the hillside was washed out revealing free gold.

Peasants rushed to the spot from miles around and are reported to have extracted 10,000 ounces, worth about \$380,000, in the last two weeks. The government then claimed the area as "crown land" but the peasants refused to quit.

Essay Winner

Saskatoon Student Is Winner Of Dominion-Wide Contest

Victoria.—William Pressesky, 906 York avenue, Saskatoon, a student of Nutana collegiate institute, has been officially declared winner of the Dominion-wide essay contest conducted in connection with the convention of the National Association of Kinmen Clubs of Canada.

Pressesky wrote a treatise on the "Autonomy of Canada." His essay was selected as the best of 15 winners from a like number of cities in the Dominion by V. L. Devlin, principal of the British Columbia Normal school here.

Plane Will Be Repaired

Grierson Hopes To Resume His Flight To Canada

Reykjavik, Iceland.—John Grierson, British flyer whose seaplane crashed here during an attempted flight from Rochester, England, to Ottawa, left here for Leith, Scotland, aboard an Icelandic steamer with the damaged parts of his machine. The parts will be repaired in England and Grierson said he hoped to return within two weeks and resume his flight to Canada.

THE AREA WHICH IS AGAIN THE DANGER ZONE

Above is a map showing the position of Austria in relation to the other nations in Europe. Austria's border on the Southwest where it joins Italy is literally covered with 48,000 Italian troops, sent by Mussolini to be ready to defend Austria's independence if necessary. Across the small area which was the great Hapsburg empire there is flashing an undercurrent of revolution which may break out at any moment. Although the Nazis failed in their efforts to take over control, even though they tried to the extent of murdering Chancellor Dollfus, the situation is still fraught with factional unrest.

Need More Relief

Native Sons Of Canada Ask For More Generous Policy

Winnipeg.—Relief matters predominated in discussions at the Native Sons of Canada, in convention here, adopted a resolution urging the Dominion government to pursue a more generous policy to districts unable to assume a greater share of unemployment relief costs.

The convention received the reply of Prime Minister R. B. Bennett in answer to the organization's telegraphed protest against the new Dominion relief policy. The convention, in its wire to Mr. Bennett, had urged the government change its attitude toward unemployment relief.

Mr. Bennett's telegram read: "Conditions necessitate placing provincial governments in position to exercise their constitutional functions with respect to relief. Federal contributions in aid are based upon experience of the past few years."

E. Hansford, St. Boniface delegate, sponsored the relief resolution. He expressed alarm at the government's attitude on relief. A resolution appealing to the government to have the words "Dominion of" deleted from the present title of "Dominion of Canada" also was passed by the convention.

Advertising Canada

Premier Bennett Moves Switch To Light Electric Sign In London

Ottawa.—Moving a switch in Ottawa, Prime Minister R. B. Bennett illuminated a giant electric sign placed on the grand building opposite Canada House in London, advertising the excellence of Canadian products. Mr. Bennett's words of dedication were, at the same time, written against the London skyline in electric letters.

The sign, a part of the advertising program conducted through the office of Hon. G. Howard Ferguson, Canadian high commissioner, bears a green maple leaf superimposed against a red triangle, the new "Canadian quality" mark recently registered in the United Kingdom. Beneath the mark appears the words—"Canada—The Empire's Larder," and in the next line, "Ask Your Grocer."

British House Adjourns

Date Of Next Session Set For October 10

London.—Both houses of parliament have adjourned until Oct. 10, unless the lord chancellor and the speaker decide the public interest requires an earlier re-assembly.

During the part of the session just over parliament passed almost 50 public bills. Those left for the autumn include the betting and lotteries bill and a measure designed to curb and punish persons inciting disaffection among His Majesty's forces. The chief issue before the next session will be that of a new constitution for India.

RECOVERY IN BRITAIN SUFFERS FROM RECESSION

London.—Parliament has adjourned with economic recovery at a crisis. For the first time since 1932, when Britain began her steady climb out of the depression, business activity has slumped.

The drop is a slight one, but it is the first, and the dominant economic question is whether it is merely temporary or the initial sign of a serious recession in the near future.

Whichever it turns out to be, observers say, the limits to Britain's recovery will be reached at a point well below her pre-depression prosperity unless there is an upward trend in world trade.

The reason is that the recovery to date has been fashioned largely out of internal, not external, demand.

Belief that there are limits to such a prosperity has been voiced by Rupert E. Beck, chairman of the Westminster Bank, who said: "The British people can never gain real prosperity merely by taking in each other's washing."

Experts ascribe Britain's present recovery to two factors: That the country has been able to get its "nerve" back and that, behind the tariff walls erected in 1931, she has been able to gain a large share of her domestic market.

Opening Of Bay Route

Prospects For A Record Shipping Season Seem Good

Churchill, Man.—Warm winds whistled down Hudson strait as harbor crews at this northern seaport prepared to open the navigation season on Aug. 10.

With 10 steamers definitely chartered and more bookings in the offing, port officials were enthused over prospects for a record shipping season. A complete crew always is on hand to receive incoming vessels into action at the huge elevator filled with 2,500,000 quarts of wheat.

First of the fleet of vessels to trade here this season, the S.S. Dalworth, will bring a general cargo from Newcastle, England.

In addition to taking her fill of grain for the outward journey, she will load 1,250 tons of flour, oatmeal and other commodities.

Cattle from the prairies and lumber will find their way to markets of the world through northern shipping lanes this season.

Spies Are Sentenced

Seventeen Convictions On Charges Of Espionage In France

Paris.—The number of convictions in the 1934 spy roundup in France has reached 17 with the sentencing of a naturalized German, who formerly belonged to the Foreign Legion, and a 19-year-old girl.

Frederick Pasquay was convicted of spying for Germany and sentenced to 18 months in prison at Metz, and Jeanne Dieudonne to year in Nancy on a charge of attempting to pry secrets from officers stationed at an aviation field.

Thirty-three arrests have been made since January, and there are more than 100 persons, arrested prior to 1934, awaiting trial on espionage charges.

French Millers Defy Law

Paris.—The millers of France have openly defied the government's efforts to regulate the price of wheat. In a letter to Premier Gaston Doumergue, the National Association of Millers said it will refuse to abide by the law which fixes the price of harvested wheat at \$2.35 a bushel and the coming crop at \$1.55.

First Wheat Shipped

Winnipeg.—The first wheat of 1934, wheat from the Manitoba district was shipped July 31 over Canadian National lines from St. Jean, Man. to Fort William, Ont. The shipper was Eugene Brunel and the wheat was graded No. 2 Northern. It was consigned to the N. M. Paterson Company.

TWO YOUTHS DROWN AS CANOE OVERTURNS

Two City youths, Sid Reid and Les Hamilton, drowned Monday morning at Edmonton Beach, when their canoe overturned in deep water. The accident happened when other campers were at breakfast. The youths set out in the frail craft, altho warned against doing so. The water was quite calm at the time. This craft was the only one on the lake at the time. The boys belonged to Silver Hawks Bicycle club, and had pedaled out from the City to the Beach on Saturday, to camp. Hamilton and Reid were pupils at Eastwood high school.

Stony Plain.

THE MEANEST OF SNEAK THIEVERY.

Indignation is expressed by residents of the Grove over the thievery perpetrated late Saturday night, when thieves got in a considerable amount of work on the wreckage of the Davis car, damaged in a collision with another car, and which was left on the Highway overnight near the Grove owing to difficulty in moving it. When the owner came out early Sunday morning to drag the car away, he found all four tires, as well as other accessories, had been stripped from the car.

Spruce Grove News.

Quite a number from this locality attended the Eucharistic Congress held at St. Albert on Tuesday last, August 7th. Sermons were preached in English, French and German. Rev. C. Keenan, of St. Joseph's Parish, was in attendance.

Negotiations have not yet been completed for the opening of the new general store at the Grove.

Mr. C. Brabbins, formerly of the Pool elevator at Spruce Grove, has been taken from Daugh and sent to the Pool elevator at Ribstone.

Mr. Jac Nichols, a former restaurant keeper here and who is running a tea room at the Beach, paid his old friends here a visit on Monday.

The marriage of Miss Emilia Schoepf, daughter of Mr. and Mrs. L. Schoepf, and Geo. M. Cormie, took place in the vestry of Robertson United church, Edmonton, Thursday, Aug. 2, Dr. J. Williams Ogden officiating. Mr. Cormie is the poultry commissioner for Alberta. The happy couple are now on a wedding trip to Vancouver.

Good progress in the construction work of the new school building is being made by Contractor Lynd and his staff.

Some of those in the district who patronize City shops were disappointed when they got there Monday to find it was a public holiday.

Mr. Fred Breithaupt wishes that the owner of the brown horse which has been estray around his premises for the past 3 weeks, would come and claim it.

During the month of August Spruce Grove congregation will worship with Stony Plain every Sunday morning at 12 o'clock. There will be no service at Spruce Grove during August.

The Mail Schedule.

From the East and to West—
Tues. Thurs and Sat., at 10:37 P.M.

From the West and to East—
Mon., Thurs and Sat. at 4:51 a.m.
Mail for East will also be dispatched to west bound train and transferred east at Jasper.

Mail for despatch to both East and West should be posted before 10 P.M.

Reg. dispatched and received with every mail.

Open Seasons for Game.

Deer, moose, Nov. 1 to Dec. 14
Ducks, geese, Sept. 15 to Nov. 14
Sik, Oct. 1—Dec. 14
Grouse, Oct. 1—31
Hungarian Partridge, Sept. 15—
Nov. 30
Fox, Nov. 1—Jan. 31
Mink, martin, otter, Nov. 1—
March 31
Muskrat, March 1—April 30

Dr. Wernet's Powder For FALSE TEETH

A Joy To All Users

Can't Slip or Slide

Sprinkle on Dr. Wernet's Powder and you won't have to think about your front teeth all day long. Joyous comfort is yours. Eat anything you want—it holds plates firmly in place—they positively can't slip or slide. Form a protective cushion for sensitive gums. Leaves no colored, gummy substance—keeps mouth sanitary, breath pleasant. Prescribed by world's most noted dentists. The cost is small—the comfort great. Any drugist.

OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Joretta", "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly deciding to live their own lives apart until Peter is able to provide for her. Peter is a young man who is studying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art with the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who has fallen in love with Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club where the rest of the members of the party go to a cabaret, Camilla awakes to find Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake in the early morning and Avis and another boy are standing near them. This makes it necessary for Peter to announce before the party that he and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and "Avis' Inspiration". Peter adopts the latter title and Camilla, heartless, goes to Peter's studio for a look to think. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he has sculptured especially for her as a wedding gift. They named it "Land of Hope". Camilla's advertising campaign was a success from the beginning, and it was arranged to have radio broadcasts, in addition to newspaper advertising. Camilla to both write the Tiny Tots stories and to deliver them over the radio.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France.

(Now Go On With The Story)

CHAPTER LV.

Camilla powdered her nose and drew her hat over her head at a pert angle, but her movements were mechanical. She was thinking neither about her nose nor the angle of her hat. Her hands trembled a little, with excitement and apprehension. In another half hour, she would

be speaking into the microphone to—thousands, perhaps. There also was a possibility that she would be speaking to no one, except Peter. She laughed shakily at the thought. All that effort and anxiety and expense, just to speak to Peter?

But she knew that would not be true. The response to her Tiny Tots had been too convincing of her public's interest, and the advertising of her radio programs too thorough to deny her an audience. She envisioned that audience now, vaguely, reaching far into limitless space, instead of her own chic figure in the dressing room mirror at the office. Her new autumn ensemble of transparent black velvet was set off by a smartly tailored white astin blouse, a white-trim purse and a pinky white bow on the snug black velvet hat perched jauntily on the back of her black curls.

She joined Mr. Bowman in the outer office, who was going with her to the studio to introduce her to that important client of the firm, Mr. Alexander Hoyt.

Even in her trepidation, she had to smile a little to herself when she anticipated that formal meeting with the man whom she had known as "daddy" all her life. It might not be quite fair of her to surprise him like this, but she thought she deserved the right to make of it an important event. The circumstances had warranted it, she believed.

Mr. Bowman's car was waiting at the curb to whisk them away with a sense of importance. It had been a long time since Camilla had ridden behind a liveried chauffeur. She would never have supposed that last time, that the next event would be a manifestation of her success in her beloved work, and so now.

Arrived at the towering building on the top of which was the broadcast-casting station, an elevator whirled them upward and deposited them in a large, handsomely appointed reception room where a girl at the switchboard announced them. The program manager, Mr. Ritchie, appeared presently and greeted Camilla with deferent graciousness.

"You must get acquainted around here and make yourself at home, if you are going to be one of our regular visitors," he told her pleasantly. "You will broadcast from studio A, so we'll go right in now. Mr. Hoyt has not yet arrived, but I expect him any minute."

They passed through several rooms and a red light flashed above the letter A on the signal board, and the voice of the station announcer began his introduction to the Wheatheart Cereal program. The orchestra followed instantly with a gay selection. Mr. Ritchie introduced Mr. Hoyt briefly and he, in turn, presented Camilla. His audience—and the occupants of that room—could have been more astonished than was Camilla herself when he said:

"Boys and girls, I am not only going to introduce to you the creator of the Tiny Tots, but I am going to pass on to you a lovely surprise which I had just a few minutes ago when I met Miss Camilla Anson. You have not known who first thought of the Tiny Tots and neither have I, before this afternoon. Imagine my surprise to discover that it was my own little girl, grown up and working for me and for you, and all the time I did not know it. I know that she was working somewhere with art work, but I never knew until now that she was bringing Tiny Tots to life for your entertainment and happiness. I wish I might tell all of you what a splendid and beautiful little girl she is, for I know you would love her as much as I do. And now, I am going to let her tell you the first adventure of her little people over the radio. Miss Anson."

Camilla never knew quite how she managed to control her voice after that comment. Fortunately, she had written out her story so that she could refer to it in emergency, which gave her a sense of security, and she managed to get through the ordeal somehow. Her voice gained confidence and clarity as she continued, and her story proved to be timed to the second for the eighteen minutes allotted her. She returned to her chair with a feeling of weak exhaustion, wondering if she had been a failure. But Mr. Ritchie smiled reassuringly and whispered, "Splendid!"

They had just been seated when a studio attendant ushered in Mr. Hoyt. Even before he crossed the room to them, he recognized Camilla, and his reserved smile of greeting was puzzled.

"Hello, Camilla. I didn't expect to see you here. Did you come to watch the broadcasting?"

Mr. Ritchie looked from one to the other, as puzzled as was Alexander Hoyt.

"You know Mrs. Anson, Mr. Hoyt? She is here to do the broadcasting. She is your very capable advertising artist, the creator of the Tiny Tots."

Camilla's smile appealed to her foster father for all that she could not express in words: her forgiveness for this secrecy and the importance of her responsibility to his venture.

"Why—of course, I know Mrs. Anson—my Camilla—can it be possible?" He was speechless, but that twinkle of pleasure that she remembered so well gleamed in his eyes before a suspicious mistiness clouded them. He took her hand quickly. "My heartiest congratulations, Camilla! It was all his credit, but to Camilla it

IXIE PLUG SMOKING TOBACCO

For real economy and enjoyment, smoke plug tobacco. The tobacco stays fresher, because you cut each pipeful as you need it... coarse or flaky, to suit yourself. And, it lasts longer in your pipe!

was like an orb of commendation, knowing the man as she did.

There were a few moments of comment and explanation, and then the room began to stir with other arrivals, people coming and going, orchestra instruments being tuned, an atmosphere of waiting expectation. A huge clock on one side of the room, with a long, impatient second hand, measured off the passing time rapidly.

Lights flashed on a signal board. Finally, double sound-proof doors were closed, everyone was in his place to avoid the least fractional second of delay. Camilla thrilled to this new experience of being a part of that vast organization of education and amusement that flooded the air all over the world from these perfectly regulated units.

A red light flashed above the letter A on the signal board, and the voice of the station announcer began his introduction to the Wheatheart Cereal program. The orchestra followed instantly with a gay selection. Mr. Ritchie introduced Mr. Hoyt briefly and he, in turn, presented Camilla. His audience—and the occupants of that room—could have been more astonished than was Camilla herself when he said:

"Boys and girls, I am not only going to introduce to you the creator of the Tiny Tots, but I am going to pass on to you a lovely surprise which I had just a few minutes ago when I met Miss Camilla Anson. You have not known who first thought of the Tiny Tots and neither have I, before this afternoon. Imagine my surprise to discover that it was my own little girl, grown up and working for me and for you, and all the time I did not know it. I know that she was working somewhere with art work, but I never knew until now that she was bringing Tiny Tots to life for your entertainment and happiness. I wish I might tell all of you what a splendid and beautiful little girl she is, for I know you would love her as much as I do. And now, I am going to let her tell you the first adventure of her little people over the radio. Miss Anson."

Camilla never knew quite how she managed to control her voice after that comment. Fortunately, she had written out her story so that she could refer to it in emergency, which gave her a sense of security, and she managed to get through the ordeal somehow. Her voice gained confidence and clarity as she continued, and her story proved to be timed to the second for the eighteen minutes allotted her. She returned to her chair with a feeling of weak exhaustion, wondering if she had been a failure. But Mr. Ritchie smiled reassuringly and whispered, "Splendid!"

did," under cover of the music which followed.

Finally, then, it was over and Camilla passed through the opened doors, feeling as if she had been on a strange journey to another world. Mr. Hoyt took her arm affectionately.

"I can't tell you how proud I am, Camilla, nor how much I appreciate what you have done for me. Your mother will be immensely pleased, too. Can't you come out to dinner with us to-night? We haven't seen much of you these days. And, no wonder," he added with a shy twisted smile.

"Sorry, but I can't to-night, dad. You know, Peter leaves day after tomorrow for New York to sail on the sixteenth. But I shall be seeing you more often when he is gone, I promise. I've been terribly busy and it doesn't look like I am going to be less busy very soon. I do want to talk with you about—everything, and I'd like to have some co-operation on some of my ideas hereafter. It's been—she stopped a little breathlessly, "rather a struggle, to make it go all alone!"

"You are wonderful," he said simply, "and we are proud of Peter, also. So glad that he won the scholarship, but I wonder what you are going to do without him."

"Just work—and wait for him," she laughed.

A boy interrupted them. "Telephone for Miss Anson, please. Over here, he directed."

Camilla wondered who could be calling her there, excused herself from the group.

"Dear, you were marvelous!" Peter's voice replied to her hesitant, "Hello."

"Who in the world but you, darling, would think of calling me before I left here?" she exclaimed joyously.

"Thought I better catch you while I could. How do you know where you may be going next? A famous wife is the most elusive thing I can imagine, and I'm going to have to speed myself up to keep up with her."

"Hopefully, Peter, did my voice sound—all right?"

"Perfect—wonderful. I'll bet your fan mail day after tomorrow snows you under."

She laughed happily. "Thanks, darling, I'll meet you in an hour, then, as I promised."

"I called because I was afraid you would forget."

"As if I could!" Camilla reproached him fondly.

(To Be Continued)

Largest Motor Coach

Travels From Baghdad To Damascus In One Day

The largest motor coach in the world has just been made and put on the road. It is well over 70 feet long, and has been designed for service on the road from Baghdad to Damascus, which passes through the Syrian desert. Formerly the journey by road took about 24 days. The new coach, it is said, will reduce this to as many hours. The vehicle, the motive force of which is a 385 horsepower Diesel engine, provides accommodation for 48 passengers, and carries a crew of 10. It has two storeys, the sleeping bunks being "upstairs."

Little Helps For This Week

"The shadow of a great rock in a weary land." Isaiah 32:2.

"In returning and rest shall ye be saved; in quietness and confidence shall be your strength." Isaiah 30:15.

O shadow in a sultry land We gather to Thy breast, Whose love enfolding like the night, Brings quietude and rest, Glimpse of the fairer life to be, In Thy shade here possessed.

Strive to see God in all things and acquiesce in His will with absolute submission. Do everything for God, uniting yourself with Him by a mere upward glance, or by the overflowing of your heart toward Him. Never be in a hurry, do everything quietly and in a calm spirit. Do not lose your inward peace for anything whatsoever, even if your whole world seems to be upset. Commend all to God, and whatever happens abide steadfast in a determination to cling closely to Him, trusting to His eternal love for you, and if you find you have wandered forth from this shelter recall your heart quietly and simply. Do not smother yourself with a host of cares, wishes or longings, under any pretext.—Francis De Sales.

Safety Minded

Organization For The Prevention Of Accidents In Industry

The fact that there is an organization set up and operated solely for the prevention of accidents in industry should be sufficient to emphasize in the public mind the importance of the work it has undertaken, and should encourage all individuals to co-operate in achieving the aims to which it aspires. When one realizes, as has been pointed out, that at least 85 per cent. of all industrial accidents are preventable, it is easy to conclude that the painful toll could be quickly and drastically reduced if the people as a whole were to become safety-minded.—St. John Telegraph-Journal.

AUTO ACCIDENT ON THE JASPER HIGHWAY

Suffering from an injured hand, Sylvia, the 9-year-old daughter of Mr and Mrs Fred Dornbusch, Golden Spike, was being taken to a City hospital on Saturday Evg. for treatment. She was in charge of her grandmother, Mrs. Willett, of Sand Hills; with Mr Geo Beuerlein driving the car.

When the outfit was passing the Loeblich farm, west of Spruce Grove, they were in collision with a car going west driven by Mr Wilfrid Davis of Edmonton. Both cars were badly damaged, the Davis car more so of the two.

The drivers of the cars escaped with some slight bruises and scratches. The Davis car had no passengers.

The two occupants of the Beuerlein car were taken to Misericordia hospital, where it was found that Mrs Willett was suffering from a triple fracture of her knee, plus cuts and bruises. The young girl Sylvia Dornbusch was found to be suffering from fractures of her ankle and nose, and cuts and bruises. Last reports from the hospital say both patients are resting easy.

Dufield Doings.

The W. L. meeting which occurred last week was held at the home of Mrs R. Brubner.

The Rev. P. G. Sutton and Mrs Sutton are at present on a visit to Mrs Sutton's sister at Vancouver.

The grain in this district is ripening fast, and grain cutting will shortly be the order of the day.

The Dufield Athletic Club will hold a meeting tonight, to discuss the matter of paying bills incurred at the time their Sports Day was held last June.

A baby clinic, held under the auspices of the W. L., was held here Saturday last.

BRIGHTBANK'S ANNUAL BALL TOURNAMENT.

Four Rival Teams Meet in a Contest for a Five- Dollar Prize.

Stony's Walther Leagner ball players motored up to Brightbank on the 1st, took part in the tournament there, and came home with 2 wins, a few errors, plenty of hits, and five dollars.

W-L played Keep Hills first and won.

Brightbank played Hansen Corners, and the latter dropped out of the contest.

The final was between the two winners—Brightbank and W-L—and won by the latter.

In the first game Pi Enders pitched to the Keep Hills boys, and made a beautiful job of it. He struck out a number of them, and the remaining outs were due to the strong support given him by his fellow team-mates. Errors were few on both sides.

Ridley Dodge pitched for the Hillers, but was knocked out of the box after a few innings. Stratton then finished the pitching job, and he held the hits down. However, W-L got 6 runs from Dodge, and Keep Hills was whitewashed by P Enders, so it left the Town boys at the big end of a 6-0 count.

As Brightbank defeated Hansen in the 2d game, W-L met Brightbank for the final. Moldenhauer pitched a good game, but his offerings could not be compared with those of E Enders, who was heaving the old apple down the alley for W-La.

On several occasions the BBs had the bases loaded with no one out; but the good right arm of E Enders and his airtight infield saved the day. Only once, when W-L was in a pinch like that did the BBs profit. One man came in on an error—twas the only run the BBs got. The next inning W-La started to hammer the ball, and soon Dr. West Biederwader was running from 3b to home, and W-La's 1st run was finished. Two more runs came in at that inning, and that was the end of the scoring. Stony's W-L won the game and brought home the bacon.

Baseball Notes.

The ball tournament billed for Holborn on the 5th did not materialize, owing to two of the teams billed for the meet not showing up. Stony and Holborn played 2 games. Result: 1st game, Stony 4, Holborn 1; 2d game, Stony 7, Holborn 6. A P Anderson, umpire.

The St. Michael-Stony Plain game on the local diamond on Saturday resulted in a win for Stony, 6-1.

A ball tournament is being arranged for Aug. 19th, to be held on Stony's grounds.

Stony's team is billed for a game at Alberta Beach on the 10th, and at Keep Hills Aug. 11th.

Cheap RR. Fares to Coast.

Another bargain fare to the Pacific Coast is being offered by C. N. Ry. Tickets will be on sale from Aug. 15 to Aug. 30, and will carry a 21-day return limit from date of sale. Tickets will be on sale in Alberta to certain points in B.C. with stopovers allowed at Jasper, Pt. George and places between these towns and the Coast. Rates will be approximately 1c a mile in coaches, with additional charge for tourist sleeper.

ANOTHER OLD-TIME RESIDENT PASSES AWAY

Louisa Rehkopf, beloved wife of Mr George Rehkopf, passed away at the family residence, at Inga, on Saturday, August 4th.

Deceased was born in Elmira, Ont., May 6, 1886, and came to this district with her parents, Mr and Mrs Henry Oppertshausen Sr., in April, 1901, with whom she was living on a farm a few miles southeast of Spruce Grove until she married Mr George Rehkopf on June 11, 1907.

Following their marriage, the couple resided in Edmonton for two years and a half, and then they settled on a farm in Inga district, where she had resided up till the time of her death.

Deceased is survived, besides her beloved husband, by 1 son Charles, and 3 daughters Viola, Elsie, Ella, all at home; by her aged parents, Mr and Mrs Henry Oppertshausen; by 4 brothers, Charles Oppertshausen, Kamloops, B.C.; Otto Oppertshausen, Rochfort; Henry and George, of Stony Plain; 5 sisters—Mrs W M Washburn; Mrs Emma Groat Sunset Prairie, Alta.; Mrs Wm Robertson; Miss Luella Oppertshausen, Brantford, Man; Mrs Richard Pfeiffer of Edmonton.

The funeral service was held at Inga Lutheran Church on Monday afternoon, when the remains were laid to rest in the churchyard, Rev H Fry officiating.

John Armbruster in charge of the funeral.

Card of Thanks.

Mr George Rehkopf and Family wish to express their thanks for the messages of sympathy received on the occasion of their sad bereavement; also for the beautiful floral offerings.

Local Motorist Loops the Loop

Mr Syball, agent for a well-known cream separator company, had the misfortune on Friday last of having his auto turn upside down while driving out the gateway of Mr Hennig, on the Highway. A short turn of the wheel did the trick. The driver wasn't hurt very much; nor was the single occupant; but the auto needs a new windshield, and Mr Syball will do the rest of the season's travelling without a car top.

Foth—Miller.

A wedding service occurred at the Reform Church, Glory Hill, when Miss Christina, daughter of Mr and Mrs Johanna Miller, became the bride of Mr Edwin Foth, the ceremony being performed by Rev C H Reppert, the pastor. After the ceremony a reception was held at the residence of the bride's parents, Main St. Mr Foth is an employee at the Harnell Crothers Dairy Farm.

Squire Williams in Edmonton

Eston Williams, formerly police magistrate at Stony Plain, is at present the acting police magistrate in Edmonton during the absence of Col. Primrose, on holidays. Squire Williams started on the job Tuesday, and will continue for three weeks.

THE SANITARY MEAT MARKET.

Beef, Pork, Veal and Lamb. Fish & Poultry of all kinds. Corned Beef, Pickled Pork, Pickled Tongue, all kinds. Bacon, Hams and Cottage Rolls. Bologna Sausages of all kinds. Wieners and Lard.
